# the Dynamic Duo™

## Product Description:

### Dual Boiler Espresso Machine

Be your own barista and create great tasting coffee to rival the best café. The Dual Boiler™ is for the coffee connoisseur who prefers to control every step in the espresso process. You can extract espresso and texture milk simultaneously, allowing you to capture the delicate aromatics of the espresso in your coffee by having the espresso and milk ready at the same time.

**Precise Espresso Extraction** - Dual Stainless steel boilers and heated group head, both regulated by our digital temperature control technology (PID), delivers water at precisely the right temperature, eliminating temperature surfing\* for consistent espresso quality, shot after shot. The Dual Boiler™ also features an Over Pressure Valve (OPV) which limits the maximum pressure throughout the extraction, helping to prevent bitter flavours in the shot. It also offers a true low pressure pre-infusion, which gradually increases the pressure to gently expand the grinds for an even extraction. There is also a shot clock and pressure gauge to help you improve your barista skills.

**Micro-foam Milk** - the steam wand, powered by the dedicated steam boiler, instantly delivers the pressure to create micro-foam texture similar to commercial machines that enhances coffee flavour and is essential to create latte art.

**Barista's Choice** - The Dual Boiler is the professional Barista's choice for their home machine. "24.5 out of 25. Ridiculously good." Craig Simon. Australian Barista Champion

Temperature Surfing. Purging and flushing water through the group head of single heat source espresso machines in an attempt to hit the correct extraction temperature.

### Smart Grinder™ Pro

Automatically doses the same amount every time you grind.

The very best taste will always come from using quality, freshly roasted coffee that's ground right before you extract. Coffee is at its peak flavour potential between 5-20 days after roasting, so always buy beans with a "Roasted On" date printed on the bag. Buying beans with a "Use By" or "Best Before" date makes it impossible to know when these were roasted. Always use a quality burr grinder, and grind right before you extract, just like the very best cafes.

Breville's conical burr Smart Grinder™ Pro uses Dosing IQ technology to automatically adjust the dose whenever you change the grind. Choose between 'cups' for French press or Filter, and 'shots' for Espresso to get the right dose for your coffee's needs. You can even tweak for taste.

## Product Technical Specs:

- **DUAL BOILER ESPRESSO MACHINE**
- **Low Pressure Pre Infusion** gently expands the grinds before extraction to help prevent 'channelling' through the coffee puck
- **Electronic PID Temperature control** maintains the extraction temperature to within +/-1°C of the selected temperature to maximise espresso flavour
- Dedicated stainless steel boilers,,
- Low pressure pre-infusion
- OPV limits the 15 bar Italian pump to the ideal 9 bar extraction pressure
- Programmable extraction pressure
- Electronic PID temperature control
- Actively heated 58mm commercial group head
- Programmable steam boiler temperature
- Integrated and removable 58mm tamper
- Dual 15 bar Italian made pumps
- Designed and engineered in Australia by Breville
- Accessories included with the Dynamic Duo: Integrated tamper, 480ml stainless steel jug, The Razor Precision Dosing Trimming Tool, 58mm stainless steel portafilter, 1 and 2 cup single and dual wall filter baskets

## Model Available In:

COLOUR	PRODUCT SKU
 Brushed Stainless Steel	BEP920BSS
 Black Sesame	BEP920BKS

## Available Product Videos

## Product Technical Specs:

- 58mm full stainless steel portafilter
- Convection heated 6 cup warming tray
- Volumetric control (manual and programmed 1&2 cup shot volumes)
- High volume instant steam
- Espresso pressure gauge
- Instant hot water outlet
- 360° Swivel action steam wand
- Descale at home
- Removable drip tray
- Top Fill 2.5L removable water tank
- Backlit LCD Interface
- 24 month repair guarantee
- **SMART GRINDER™ PRO**
- Set Dose in 0.2 sec Increments
- High precision burr calibration for more consistent grinding
- Dose pause function
- Programmable Shot/ Cup Volumes
- Large capacity 450g bean hopper with air tight lid and locking system for easy removal and transfer of beans
- Backlit LCD screen
- Two stainless steel portafilter handles (50/54mm & 58mm size)
- Grinds Container
- Conical burr cleaning brush
- Removable grinds catch tray
- Designed in Australia by Breville Design
- **APN Number:** 9312432024303
- **TUN Code:** 19312432024300
- **Voltage:** 220-240V
- **Wattage:** 2200W
- **Unit Weight (kg):** 15.8 kgs
- **Master Carton Weight (kg):** 1.322 kgs
- **Gross Shipping Weight (kg):** 19.8 kgs
- **Units per Carton:** 1
- **Shipper Dimensions (HxWxL mm):** 476 x 461 x 646 mm
- **Display Box Dimensions (HxWxL mm):** 458 x 450 x 635 mm
